PROFESSIONAL SUMMARY

Seasoned Software Engineer with 7+ years of progressive experience building scalable, secure, and high-traffic applications across several major industry verticals — fintech, telecom, SaaS, defense/education distribution and export-import. From engineering PSO payment gateways with multi-provider integration to developing self-care applications for 66M+ subscriber base of Robi and Cirkle, I bring a proven ability to deliver complex solutions under tight deadlines with 100% sprint success rate. Technically deep in the Laravel ecosystem, Vue.js, and relational databases, with hands-on exposure to AI-assisted and spec-driven development practices, and a growing focus on system design, microservices architecture, and large-scale technical decision-making in pursuit of a software architecture career path.

TECHNICAL SKILLS

- **Languages:** PHP, JavaScript, TypeScript, SQL, Python
- **Backend:** Laravel, Flight PHP, Slim, FastAPI
- **Frontend:** Vue.js, Vuex, HTML5, CSS3, Bootstrap CSS
- **Databases:** PostgreSQL, MySQL, SQLite, Redis
- **Cloud & DevOps:** Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins), AWS (EC2, S3, Lambda, ECS)
- **AI Practices:** AI-driven Development Lifecycle (AI DLC), Spec-driven Development (SDD), AI-assisted Development, Claude Code, Spec Kit, Copilot CLI, ChatGPT, Deepseek
- **Tools & Practices:** Git, REST APIs, Microservices, Agile/Scrum, JIRA, Kibana, Postman, Swagger, Figma

PROFESSIONAL EXPERIENCE

Software Engineer

Portonics Limited — Dhaka, Bangladesh *Apr 2024 – Present*

- Currently contributes to the platform powering My Robi and My Cirkle (formerly My Airtel) apps, the flagship self-care applications for 56M+ subscriber base of Robi and the 10M+ subscribers under the legacy Airtel brand in Bangladesh, respectively.
- Piloting the adoption of AI-Driven Development Lifecycle (AI DLC) and Spec-Driven Development (SDD) practices alongside the existing Agile/Scrum sprint-based workflow, contributing to process modernization efforts within the team.
- Previously developed and deployed multiple features and RESTful APIs for Eagle App, the agent mobile application for ATOM Myanmar, serving a 300k+ user base using Flight PHP.
- Delivered 100% of sprint-planned features on schedule, tracked and managed via JIRA in an Agile/Scrum environment.
- Authored comprehensive project documentation including FRS, SRS, DB schemas, ERDs, use-case diagrams, flow diagrams, and API documentation for all major feature releases.

Software Engineer

Daraz BD (Alibaba Group) — Dhaka, Bangladesh *Oct 2023 – Mar 2024*

- Architected SaaS-based product with secure OAuth2 authentication using Laravel Passport and role-based access control using Spatie Permissions, enabling 5 business ventures to operate on a single platform.
- Collaborated with cross-functional teams in an Alibaba Group engineering environment, following enterprise-grade code review and deployment practices.
- Conducted code reviews and maintained coding standards aligned with Alibaba Group's enterprise engineering practices.

- Contributed to improving internal development workflows, reducing code review turnaround time.

Software Engineer

PayStation (Service Hub Ltd.) — Dhaka, Bangladesh *Dec 2022 – Sep 2023*

- Engineered a secure Payment System Operator (PSO) gateway using Laravel, processing 1M+ BDT in monthly transactions with 99.9% uptime.
- Integrated 5+ Payment Service Provider (PSP) gateways including AMEX, Mastercard, and Visa, expanding payment coverage for end users.
- Developed a Progressive Web App (PWA) for bus ticket services on the MyBL app, used by 41M+ subscribers of Banglalink, one of Bangladesh's largest telecom operators.

Associate Software Engineer

Swapnoloke — Dhaka, Bangladesh *Sep 2019 – Nov 2022*

- Led the development team for digital assessment solutions deployed across multiple military training institutions, achieving 100% client satisfaction.
- Gained hands-on expertise across 3 different industry verticals (defense, export-import and education), adapting quickly to diverse domain requirements.
- Designed and implemented backend services and database architectures to support mission-critical assessment workflows.
- Managed full project lifecycle from requirements gathering to deployment, serving as the primary technical decision-maker.

Web Developer

Connect Bangladesh — Dhaka, Bangladesh *Apr 2019 – Aug 2019*

- Built and maintained responsive web applications for 3 client-facing websites using HTML, CSS, JavaScript, and PHP.
- Implemented SEO best practices and performance optimizations, improving page load times and organic search visibility.
- Improved Google search index ranking by 70%+ within 2 months through strategic on-page and off-page SEO optimization.

EDUCATION

Master of Science in Computer Science

Jahangirnagar University — Savar, Dhaka-1342, Bangladesh

Graduated: 2018 GPA: 3.7/4.0

Bachelor of Science in Computer Science

Daffodil International University — Savar, Dhaka-1216, Bangladesh

Graduated: 2017 GPA: 3.81/4.0

TRAINING & PROFESSIONAL DEVELOPMENT

- **Data Science Fundamentals** – Ostad (2025)
- **Run Your First Code with Python** – Ostad (2025)
- **Cloud Journey with AWS: Beginner to Advanced Level** – BITM (2023)
